# Review of UK Pavement Management Systems Core Functionality

## Questionnaire

Q.1 What should a PMS be able to do on UK local roads?

Question 1 notes:

This question relates to PMS to be used on local roads in the United Kingdom.

This question might be answered in different ways.

If you use a PMS: –

What do you use it for?

What do you need it to do for you?

What else would you like it to be able to do for you?

If you develop or supply a PMS: –

What functionality do you provide?

(eg brochures, product descriptions, etc. )

What do your customers use it for?

(eg provide examples)

Please type your answers within the box below

A.1 What a PMS should be able to do on UK local roads:

---

Q.2a What should all PMS be able to do in the same way on UK local roads, and

Q.2b Why do they need to do it in the same way?

Question 2 notes:

These questions relates to PMS to be used on local roads in the United Kingdom.

There are two different aspects to this question.

What needs to be the same in different systems?

(And why does it need to be the same in different systems?)

What needs to be the same in different highway authorities?

(And why does it need to be the same in different authorities?)

Please type your answers within the box below

A.2a What all PMS should be able to do in the same way on UK local roads:

A.2b Why all PMS need to do this in the same way:

---

Q.3a Where is further research and development needed, and

Q.3b Does this need to be commissioned centrally and, if so, why?

Question 3 notes:

These questions relates to PMS to be used on local roads in the United Kingdom.

There are two different aspects to this question.

Why is research and development needed?

(What are the gaps in knowledge or understanding that we need to bridge?)

Why does the research and development need to be commissioned centrally?

(Why is it not possible for these particular research and development tasks to be carried out commercially?)

Please type your answers within the box below

A.3a Where further research and development is needed:

A.3b What further research and development needs to be commissioned centrally, and why:
